

We Want You... to get your share...

The government's American Recovery and Reinvestment Act of 2009 has given you another great reason to buy energy efficient replacement windows for your home! It allows eligible taxpayers to get back 30% of the product costs to replace windows in their primary residence with qualified energy efficient windows.

To qualify for the credit:

- Replacement Windows must have a U-Factor of .30 or less, and a Solar Heat Gain Coefficient (SHGC) of .30 or less. Unlike a lot of our competitors, nearly all West Window replacement window models when built with Low-E² 270 glass and argon gas qualify for the tax credit. Please see our Qualifying Product List for details.
- Homeowner (taxpayer) must file IRS form 5695 (2009-2010 Version) with their Federal Tax Return. The homeowner should retain all sales receipts and contracts. The homeowner may claim the 30% Tax Credit for the cost of the product only (no labor), up to \$1500.00 maximum. A Manufacturer Certification Statement is available upon request, and is also available for download (.pdf) at www.westwindow.com.
- Applies to the homeowner's principal residence only.

Examples: You calculate your tax credit by taking 30% of the qualifying window cost, up to a maximum of \$1500.00 tax savings.

Product Costs: \$ 5000.00 x .30 = \$1500.00 (this is the maximum savings)
 \$ 4500.00 x .30 = \$1350.00
 \$ 7500.00 x .30 = \$1500.00 (\$1500.00 is the maximum)

Disclaimer: The summary information above is not intended as legal or professional tax advice. You should consult a tax professional with specific questions regarding this tax credit. Additional important information can be found at www.energystar.gov/taxcredit.
