

*These architectural extruded aluminum louvers are configured to meet the required free area, bar arrangement, blade angle, and unit attachments for most Packaged Thermal Air Conditioning (PTAC) through-the-wall units. They can be directly glazed to our frame providing a thin slim line decorative appeal that enhances the outside appearance of any facility. This louver is available in standard and custom sizes with various frame choices and finishes to fit your unique requirements. Please call our office with your specifications for a quotation.*
