

ALUMA-TILT®

ALUMA-TILT® is a 5/8" balance made for commercial grade windows capable of balancing a window sash weighing up to 40 pounds in single pair applications. This balance is adjustable for a wide range of tilt applications in Aluminum windows. ALUMA-TILT is rated Class 2 on the AAMA Verified Components List.

- **Smooth, Uniform Operating Force**
- **Broad, Adjustable Weight Range**
- **Laser Welded Aluminum Tube**
- **Can be field adjusted if necessary**
- **Performance to AAMA Class 2**

ULTRA-LIFT®

ULTRA-LIFT® is a .670" diameter hybrid balance ideal for heavier window sash applications. Single pair sash weight capacity is available up to 80 pounds. By combining the best qualities of torsion spring, extension spring, and spiral rod technologies, the ULTRA-LIFT balance will consistently deliver exceptional AAMA Class 5 performance. Each balance is custom-made to fit a given sash weight, and is pre-tensioned so that it optimally operates the heavier commercial window sash with a manageable effort.

- **High Lift Assistance makes operating heavy sash easier.**
- **Boosted Force Curve helps initiate opening of sash**
- **Low carbon coated steel rod for long service life**
- **Performance to AAMA Class 5**

West Window Corporation is proud to partner with Caldwell Manufacturing as the preferred supplier of sash balances for our single hung and double hung commercial aluminum windows. Caldwell has produced spiral balances continuously for more than 60 years and they have been in the window balance business since 1888 – giving them more than 120 years of industry experience.
