

## Features

- The Two-Piece Receptor and Three Piece Mull System is the perfect solution for large openings – windows can be installed one at a time and mull together right in the opening. This system also allows you to compensate for most out of square openings.
- For 2-5/8" frame depth windows
- T-6063 Aluminum Extrusions with minimum .062" walls.
- Thermally Broken
- Ships fully weatherstripped
- Can be used for all Westco Products. (*Projection systems require additional 1/2" mullion spacers. Please refer to the detail drawing on Form 4949.*)
