The Westco Projection Series Fixed Unit (used with Casement, Hopper, and Awning windows) is a heavy-duty aluminum light commercial window with a distinctly residential look and feel. Drawing on our many years of residential and light commercial window experience, we have developed a completely new product that blends the pleasing aesthetic appeal of residential windows with the rugged serviceability and performance of thermally broken commercial aluminum. The Westco Projection Series of products rounds out our very popular Westco Single Hung, Slider, and Fixed window lines which have been used in numerous schools, hotels, and other commercial and residential applications for many years.
