- Mullion for multiple units
- Many Grid Between Glass (GBG) configurations are available for greater design flexibility and low maintenance.
- Stainless Steel Hardware
- Egress hinges and sash control devices are available
- Optional Nailing Fin and Face Flange

The Westco Casement is a heavy-duty aluminum light commercial projection window with a distinctly residential look and feel. Drawing on our many years of residential and light commercial window experience, we have developed a completely new product that blends the pleasing aesthetic appeal and ease of operation of residential windows with the rugged serviceability and performance of thermally broken commercial aluminum. The Westco Projection Series of products rounds out our very popular Westco Single Hung, Slider, and Fixed window lines which have been used in numerous schools, hotels, and other commercial and residential applications for many years.
